GOSHOW TO SPEAK AT GREENBUILD INTERNATIONAL EXPO

New York, NY (June 1, 2010) – Nancy Aber Goshow, co-founder and managing partner of Goshow Architects in New York, will speak at the Greenbuild International Conference and Expo in Chicago, IL November 17-19, 2010.

The conference theme is “Generation Green – Redefining our Future” and will showcase the latest innovations in green building and how they can grow a business.

Goshow Architects put together the education session, which will be on High Performance Green Building Modernizations in the Public Sector. The focus of the session will be on the Federal Government's role as a catalyst for sustainable practices to improve America's future through green building modernization.

As a leader in sustainable public architecture, Goshow will discuss working with the federal government, project management including the integrated design process to keep sustainability at the forefront, the associated LEED rating systems and documentation for these projects.

Other members of the panel will be Kim M. Fowler, founder of the Pacific Northwest National Laboratory, Donald Horn, Director of Sustainable Design for the General Services Administration (GSA), and Daniel Nall, Director of Sustainability for WSP Flack + Kurtz.

Put on by the US Green Building Council, Greenbuild is the world's largest conference and expo dedicated to green building. Thousands of building professionals from all over the world come together at Greenbuild for outstanding educational sessions, renowned speakers, green building tours, special seminars, and networking events.

Goshow Architects is the largest woman-owned full service architectural firm in New York City. Goshow is dedicated to improving communities through long-term, sustainable design solutions. Established in 1978, the 40-person practice is a leading expert of green design, particularly for the public sector including higher educational facilities and public K-12 schools.
